

ALI RAZA KHAN

Associate Software Engineer

+92 324 4371444 | [Portfolio](#) | [LinkedIn](#) | [Email](#)

PROFESSIONAL SUMMARY

Versatile Software Engineer with hands-on experience in Python, C++, machine learning, and game development. Proven track record of delivering end-to-end solutions spanning deep learning pipelines, web-based interfaces, real-time gameplay systems, and AI-driven behavior. Comfortable across the full software lifecycle: system design, algorithm implementation, API development, and deployment. Eager to contribute technical depth and adaptability to teams working in AI/ML, computer vision, backend engineering, or interactive media.

TECHNICAL SKILLS

Languages: Python, C++, C#, React

AI / ML & Data Science: Machine Learning, Deep Learning, Computer Vision, NumPy, Pandas, Scikit-learn, Jupyter Notebook, TensorFlow / PyTorch (familiar)

Web & Backend: Web application development, server-side scripting, database integration, API consumption

Game & Real-Time: Unreal Engine (C++ & Blueprints), Unity (C#), Game Physics, AI Behavior Trees

Tools & Platforms: Git, Visual Studio Code, NVIDIA Omniverse, WordPress, HTML, CSS

Practices: Scalable system design, algorithm design, OOP, agile workflows

PROFESSIONAL EXPERIENCE

Associate Software Engineer (Unreal Engine) | [Devsinc](#)

Jun 2025 – Present

- Designed and implemented gameplay systems in Unreal Engine using C++ and Blueprints, covering combat mechanics, weapon systems, and interactive features.
- Built AI behavior pipelines using Unreal's Behavior Tree framework for enemy NPCs and companion characters.
- Developed modular weapon systems supporting both third-person and first-person shooter and RPG mechanics.
- Applied software engineering best practices including component-based architecture, code review, and version control within a professional product team.

Game Development Intern (Unreal Engine) | [Dreamcast Interactive](#)

May 2025 – June 2025

- Built a strong foundation in Unreal Engine through hands-on development with Blueprints and C++, focusing on gameplay programming, actor components, UI systems, and object-oriented design principles.
- Explored multiplayer architecture including client-server networking, replication, RPCs, and synchronization of gameplay systems, developing prototype projects to gain practical experience in scalable game development workflows.

Game Development Intern (Unity) | [Mindstorm Studios](#)

Jun 2024 – Sep 2024

- Developed Mercy or Justice, a choice-based visual novel in Unity from concept to completion.
- Created custom UI animations for dialogue boxes, menus, and sound settings to enhance user experience.
- Designed structured data holders for managing game elements including speakers, scenes, and narrative choices.

Web Development | [Lahore University of Management Sciences \(LUMS\)](#)

Sep 2020 – Nov 2020

- Developed CyberKhel.com, an entertainment and gaming website, using WordPress, HTML, and CSS.
- Designed and structured web pages to deliver an engaging user experience for a gaming-focused audience.

PROJECTS

Deepfake Detection System · Final Year Project

- ▶ Built an end-to-end deepfake detection pipeline using machine learning and deep learning techniques to classify manipulated video content.
- ▶ Engineered feature extraction and preprocessing workflows with Python, NumPy, Pandas, and Scikit-learn; tracked experiments in Jupyter Notebook.
- ▶ Deployed the model behind a web-based interface allowing users to upload videos and receive real/fake classifications in real time.
- ▶ Applicable skills: computer vision, model training and evaluation, data preprocessing, and web integration; transferable to any ML/CV role.

EDUCATION

Bachelor of Science in Computer Science 2021 – 2025

Lahore Garrison University (LGU)

Intermediate in Computer Science (Pre-Engineering) 2018 – 2020

Forman Christian College (FCCU)

CERTIFICATIONS

- Rookie Game Jam Summer Program 2024 *Mindstorm Studios*
- Develop, Customize, and Publish in Omniverse With Extensions *NVIDIA*
- Web Development *Lahore University of Management and Sciences (LUMS)*
